

EDWIN JAGGER  
— SHEFFIELD — ENGLAND —

---

The Finest Handmade Shaving Accessories  
by Sheffield's Master Craftsmen

---

# Edwin Jagger®, manufacturer of finest handmade shaving accessories

Edwin Jagger® was established in 1988 to design and manufacture a variety of high quality accessories.

Neil Jagger, founder of Edwin Jagger® used the initial months of the company's existence to design a range of handmade shaving accessories, enlisting some of Sheffield's most skilled craftsmen to carry out work of the highest standard. His dedication and commitment to quality and craftsmanship handed down from one generation to another has resulted in an exclusive range of shaving equipment named in memory of his grandfather Edwin Jagger®.

Silversmiths, buffers and polishers use carefully selected materials and superior craftsmanship to create flawless surfaces. All Edwin Jagger® premium handmade products are guaranteed a lifetime of use.

The combination of expert design, the skill of craftsmen and modern technology has helped create the Edwin Jagger® range of traditional and contemporary razors, shaving brushes, soap bowls, shaving sets and travel items.

Edwin Jagger® researches and tests the availability of new high performance materials and is pleased to introduce a new range of Synthetic Fibre filled shaving brush options, all providing more efficient and luxurious wet shaving experiences.

# The Edwin Jagger® Premium Collection, cutting edge technology and masterful craftsmanship

Precisely machined using  
computer aided  
design and modern  
manufacturing  
technology

Edwin Jagger® is internationally renowned for the design and manufacture of shaving accessories. Using computer aided design and modern manufacturing technology Edwin Jagger® developed the elegant Bulbous collection. Hard bright or satin chrome coatings highlight exquisitely hand carved patterns on razor and shaving brush handles.

# The Edwin Jagger®

## 3ONE6 Stainless

## Collection

Edwin Jagger® 3ONE6 Stainless Steel Double Edge Safety Razors.

The sensational performance and finish of the Edwin Jagger® 3ONE6 Stainless Steel Double Edge Safety Razor has been achieved using revolutionary product design and advanced precision manufacturing techniques.

The 3ONE6 is a versatile and easy-to-use razor – the quality of the shave remains consistent from a wide variety of shaving angles while the balance and weight should delight all shavers. Its slimline form ensures a nimble shave with reliable, smooth and efficient results.

## The 3ONE6 Collection

The 3ONE6 range takes its name from the 316 grade of stainless steel a grade still forged in Sheffield, England, the home of Edwin Jagger® Limited. Stainless steel, with its sleek, shiny surface and tremendous strength, has revolutionized most modern industries, including medicine and healthcare. The non-corrosive and rust-resistant properties of stainless steel have made it the ideal choice for wet shaving implements, with a superior resistance to corrosion and pitting.

316SBB

Famous within the world of wet shaving for the highly regarded design and performance of classic Double Edge Safety Razors, Edwin Jagger® now celebrates the design and use of a new material for the 3ONE6 safety razor head, a completely new head design.

The two-part razor head is the first ever stainless steel Double Edge Safety Razor head to be produced in the UK using 100% metal injection moulding (MIM).

The radical unique design with carefully planned layout of the moulded locating pins minimises possible movement of the flat razor blade when secured between the top and bottom plates, makes the razor quick and easy to assemble and offers increased stability of the blade edge during the shave. The new delicately ridged skin guards on the outer edges of the base plate gently stretch the facial skin to create a uniform shaving surface and prepare the beard hair for an efficient shave. Excess shaving lather and cut hair is smartly channelled away through four cleverly positioned lather slots to prevent the razor from clogging as its shaves. These features ensure the Edwin Jagger® 3ONE6 Double Edge Safety Razor delivers a smooth, quick and effortless shaving experience.

**The Edwin Jagger® 72 Range**  
With Black Synthetic Fibre Shaving Brushes

# The Edwin Jagger®

## Diffusion Collection

The unmistakable characteristics of the Diffusion Collection are expert manufacturing quality and refined design style.

At the heart of our business is our shaving razor range, complemented by stylish affordable matching synthetic fibre fill shaving brushes, stands and many other shaving accessories.

Edwin Jagger® represents lasting values. The Diffusion Range is characterised by its diversity, combining beauty and functionality with durability and outstanding performance.

*"The synthetic brush holds the lather really well and when it dries, it puffs right back into shape."*

# The Edwin Jagger®

## Diffusion Collection

In its dedicated Sheffield manufacturing facility, Edwin Jagger® creates bespoke contemporary design shaving sets, with an option of three of the best performance blade systems available. Each hand assembled shaving razor is supplied with either a Gillette® Fusion® Proglide, Gillette® Mach 3® or Traditional Double Edge Safety Razor Blade.

A combination of finest materials, latest CNC machining technology, traditional hand finishing and assembly combine to produce elegant and contemporary design ranges of shaving accessories. Balance and shape ensure reassuring and rewarding daily wet shaving experiences.

## **Natural and Paraben Free**

The luxurious lathering properties of our creams and soaps are enhanced by subtle natural extracts of Aloe Vera, Sandalwood and Limes & Pomegranate for a wonderfully smooth shaving experience. Wherever possible the natural ingredients are obtained using energy efficient means. Our supreme quality Indonesian Sandalwood oil, like many essential oils, is extracted using a water steam distillation process while the natural gel used for the Aloe Vera products is squeezed from the plant using a press. All Edwin Jagger® products are paraben and paraffin free.

At Edwin Jagger® we understand and share the environmental concerns of our customers and place great emphasis on selecting the very best natural ingredients for our range of hydrating pre shave lotion, traditional hard shaving soaps, premium shaving creams and aftershave lotions. It is of paramount importance to us that we offer our customers shaving products that are both safe and effective for the skin and at the same time environmentally friendly. Our products comprise 99% natural components, many derived from organically cultivated plants, replacing synthetic substances and mineral oils.

### **Aloe Vera**

#### **Sensitive Skin Formulation**

Aloe Vera is acknowledged as a soothing and natural preparation for sensitive skin with properties that help to protect, repair and replenish. The fragrance is delicate and restrained, less obvious and unassuming. Excellent for sensitive skin.

📦 ASLAV  
After Shave Lotion  
100ml/3.5 fl oz

📦 SCAVT  
Premium Shaving Cream  
Tube 75ml/2.5 fl oz

📦 SCAV  
Premium Shaving Cream

# Edwin Jagger® razor & shaving brush technical information

## Edwin Jagger® Razor Blade Systems

Edwin Jagger® razors are constructed using only the finest materials. Each razor combines solid brass components and high grade polyesters polished for over 50 hours. Multiple precision die-cast components are laser etched and lathe turned before being finished with the very finest chrome plating to achieve a beautiful finish. Edwin Jagger® offers a range of razor systems with handles available in an exciting array of colours and materials.

Edwin Jagger® Ltd. has been appointed by Procter & Gamble as a 'Gillette® Trusted Partner' manufacturer of shaving accessories fitted with Gillette® Genuine Parts. Edwin Jagger® Mach3® and Fusion® razors are compatible with Gillette® Mach3® and Fusion® razor blade systems available from retailers worldwide. The unique combination of Gillette® Genuine Parts™ and Edwin Jagger® design creates an unrivalled shaving experience.

Gillette® Mach3® and Gillette® Fusion® are registered trademarks of Procter & Gamble. Edwin Jagger® Ltd is not affiliated with Procter & Gamble.

Gillette® Fusion® ProGlide® Razor Head (F)

The Gillette® Fusion® ProGlide® is one of Gillette's most popular blade systems. The five blades are positioned close together to evenly distribute the shaving force providing exceptional comfort and performance. This head has five blades protected by guards and lubrication strips, and a sixth blade on the rear edge for precision trimming. Gillette® Fusion® ProGlide® blades are extremely popular and can be purchased in supermarkets, pharmacies and drugstores worldwide.

DE8 Die cast chrome plated Double Edge Safety Razor Head (DE/SR)

Originally introduced in the 1890's and now extremely popular with experienced wet shavers. The flat stainless steel blade, sharpened on both edges, offers a simple but effective single cutting action similar to that of an open cut throat or straight razor. Traditional safety (double edge) blades are available from many pharmacies and drugstores worldwide.

Gillette® Mach3® Razor Head (M3)

This blade head system guarantees a very close and safe shave with the revolutionary triple blade system produced by Gillette®. Three blades protected by guards and lubrication strips ensure smooth, comfortable shaving with one of the safest shaving systems available.

Gillette® Mach3® and Mach3® Turbo blades are extremely popular and can be purchased in supermarkets, pharmacies and drugstores worldwide.

3ONE6 Superior Metal Injected Moulded Stainless Steel Double Edge Safety Razor Head (3ONE6 DE/SR).

Originally introduced in 2019 and now extremely popular with experienced wet shavers. The flat stainless steel blade, sharpened on both edges, offers a simple but effective single cutting action similar to that of an open cut throat or straight razor. Traditional safety (double edge) blades are available from many pharmacies and drugstores worldwide.

### Why use Synthetic Fibres?

Edwin Jagger® Synthetic Fibre fill shaving brushes are available with two fibre fill options and are guaranteed vegan friendly. The other key benefit is that the brush dries very quickly and is extremely resistant to problems associated with lather residue in natural badger hair brushes.

The lathering process whips hot water, soap and air into a warm foam that cleanses the skin and lubricates the path of the razor. Water is the key element in a good shave and the more a brush can hold, the better the lather and shave will be. The fine tips of the hairs help to make a smooth and creamy lather. The exceptional softness of Edwin Jagger® shaving brushes cleanses the face gently, giving a comfortable and reliable shave.

It is very robust and is highly resistant to wear and discolouration meaning the soft feel and texture does not deteriorate. These features make Edwin Jagger® synthetic fibre brushes remarkably durable for daily use and especially for travel. The soft, densely filled, shaving brush head means a synthetic fibre shaving brush is now the first choice for many discerning wet shavers.

### There are four types of shaving brush hair:

Synthetic Silver Tip Fibre (31)

The preferred quick drying, easy to maintain alternative to badger hair. Suits all skin types, especially sensitive skin.

This is a premium, handmade, synthetic alternative to natural badger hair and each brush can retain optimum amounts of hot water to create a rich, luxurious shaving cream or soap lather for perfect wet shaving. To closely mimic the feel of silver tip badger hair, each individual fibre is extruded with a natural, built in flex point and the precision machined taper near the tip is designed to guarantee ultra-soft and flexible performance.

Synthetic Black Fibre (21)

The preferred quick drying, easy to maintain alternative to badger hair. Suits all skin types, especially sensitive skin.

This is a standard, synthetic and affordable alternative to pure badger hair. The other benefit is that our synthetic brushes dry very quickly and are extremely resistant to problems associated with lather residue in natural badger hair brushes. Stiffer synthetic black fibres gently massage and exfoliate the skin during lathering.

Silver Tip (ST)

This is the highest quality of all. The finely graded and sorted silver tip badger hair is the softest, rarest and most expensive badger hair. The natural untrimmed silver tips produce the highest quality shaving brushes available worldwide. The natural colouring of this hair is enhanced by careful hand grading and filling. The shape of our silver tip filled brushes is created by hand. The long hair from the neck of the animal is ultra soft, flexible, and will provide years of luxurious shaving.

Best Badger (BB)

This good quality badger hair is generally regarded as the benchmark standard of handmade shaving brush manufacturers. The hair is harvested from the badger's pelt and although individual hairs may vary between shades of brown and grey the colour is generally darker than silver tip and super badger fills. It will produce a luxurious lather when used with a good quality shaving cream or soap.

### The Collection and Sterilisation of badger hair

All badger hair used by Edwin Jagger® is from the species 'Meles – Meles' and originates from one common source. Currently badger hair is only available from China and this is the only certified source of the natural badger hair product. The hair is made available for sterilisation and grading for use in the shaving brush manufacturing industry. Edwin Jagger® Limited is committed to ensuring a source of raw material and product that complies with all European and US ethical standards of trading.

# The Edwin Jagger®

## PPS Program

The PPS (Pick, Pack & Ship) Program is designed to speed up product delivery times to Edwin Jagger® customers. All products included in the program are clearly marked in our catalogue and price list with the prefix .

All products in the program are hand-finished and pre-packed in convenient case pack sizes, typically 2 or 3. The PPS program allows for a quicker, more efficient dispatch times.

Ideally all PPS products should be ordered in multiples of 2 or 3 to match their PPS case pack size. The case pack size is detailed in the Edwin Jagger® price list.

### FAQs

#### Which products are sold in packs of 2 or packs of 3?

- **2 unit PPS packs:** All Edwin Jagger® hardware products for example 3 or 4-piece shaving sets, razors and brushes, shaving bowls and travel accessories.
- **3 unit PPS packs:** All Edwin Jagger® software products for example pre shave, shaving soap and shaving cream, aftershave lotion, beard oil, beard wash and moustache wax.

#### What does a PPS case pack look like?

- A PPS case pack is a white outer carton. This provides product protection during delivery and storage. PPS packs also make product storage easier. They are clearly marked on the outside with the product code, a unique barcode and the quantity of the contents.

#### Why aren't all products in the PPS program?

- The PPS program is designed to ensure our most popular ranges and most frequently ordered products are available for priority picking and shipping. The PPS program can be used to support rapid stock and inventory replenishment. Ordering non-PPS products may lead to a longer delivery time as many non-PPS products are from the handmade premium range requiring specialised hand skilled manufacturing processes.

#### Can I order PPS items in single units as an alternative to ordering pack sizes of 2 and 3?

- Yes, you may still order single product units. Individual units are not part of the PPS program so delivery times may be longer. PPS products in pre-packed cartons are part of an efficient supply process that generates cost savings for all our direct trade customers.

Edwin Jagger® is proud to  
announce its appointment as  
a Gillette® Trusted Partner

Edwin Jagger® has been appointed by Procter & Gamble as a 'Gillette® Trusted Partner' manufacturer of shaving accessories fitted with Gillette® Genuine Parts™. Edwin Jagger® Mach3® and Fusion® razors are compatible with Gillette® Mach3® and Fusion® razor blades available from retailers worldwide. The unique combination of Gillette® Genuine Parts™ and Edwin Jagger® design creates an unrivalled shaving experience.

# Introducing the Edwin Jagger® Display Case

The fully assembled Edwin Jagger® Counter Top Display is constructed using a precision made real solid wood frame with a lift off lid.

Plexiglass and toughened glass panels complimenting height adjustable glass shelves provide maximum natural product lighting in this attractive strong and durable dedicated display case.
